Mini Pebble Bark

Mini Pebble Bark is a virgin forest product consisting of 100% ground Douglas and Red Fir bark. It is screened to $\frac{1}{2}$ " to $\frac{3}{4}$ ", with less than 10% by volume below $\frac{1}{4}$ ".

This humus is a bright, natural red, perfect for accenting planted areas. Mini Pebble Bark is also ideal as a source of organic matter for amending and aerating problem soils, or as a component to add porosity to a custom nursery blend.
